PROFILE

Backend/full-stack developer with experience in Python and Vue.js, specialized in process automation and systems integration, with experience in ERP environments. I automated factory production processes, reducing manual intervention from 3 operators to 1. I work with SQL, REST APIs and Git, in a team and with agile methodology.

EXPERIENCE

Python / JavaScript Developer for Odoo

January 2026 - June 2026

Masterfoam Flexsolutions S.L.U. (*Igualada*)

- I automated factory processes (stock, production and time-tracking control) by developing backend features and REST APIs on Odoo, reducing manual intervention in one process from 3 operators to 1.
- I developed the frontend in Vue.js connected to Odoo via REST API, used daily by more than 20 workers on the factory floor.
- I trained more than 20 users, gathering requirements directly from the operators to adapt the application to the real workflow.

Software Development Internship

October 2025 - January 2026

Masterfoam Flexsolutions S.L.U. (*Igualada*)

- I developed custom Odoo modules with Python and XML: models, views, business logic, tests and technical documentation.

IT Support Technician — Training Internship

February 2023 - June 2023

Institut Joan Brudieu (*La Seu d'Urgell*)

- Network configuration, operating system installation and hardware maintenance.

IT Support and User Training — Erasmus+

June 2023 - July 2023

Scuola XXV Aprile (*Turin, Italy*)

- Training and IT support for students in the use of equipment and digital tools.

Front-of-House Manager

2021 - Present

Ca la Núria (*Bellver de Cerdanya*)

- Coordination of the front-of-house team during high-volume service, with direct customer interaction and real-time problem solving.

EDUCATION

Multiplatform Application Development (Higher VET) *Institut Milà i Fontanals*

2023 - 2025

Microcomputer Systems and Networks (Intermediate VET) *Institut Joan Brudieu*

2021 - 2023

SKILLS

Languages: Python, JavaScript, Java, C#, SQL, XML, HTML/CSS

Tools/Frameworks: Odoo, Vue.js, ASP.NET Core, Git, Linux, APIs REST, Scrum

Databases: MySQL, MongoDB, Oracle Database, PostgreSQL

Languages: Spanish and Catalan (native), English B2

PROJECTS

[Footprint Mappa — technical test](#) - *Next.js 16, React 19, Tailwind CSS, Xano, Vercel*

App that converts a CSV file into a carbon footprint PDF report with statistics and charts, featuring authentication, an explanatory AI chat and an AI recommendations agent on Xano. Full frontend and API built in one week.

[Risk Multiplayer](#) - *C#, .NET, WPF, Java, Spring Boot, MySQL, WebSockets*

I developed the desktop client in WPF (C# / .NET) with the interface and game logic, connected via WebSockets to a Java 21 and Spring Boot backend on MySQL. Client-server architecture, team of 3 people.
